Profile

Passionate programmer specializing in Unity and Unreal Engine development, with strong experience in gameplay and tools programming. Focused on improving workflows, usability, and performance to create polished, efficient game experiences. Committed to building engaging, high-quality interactive systems and continuously refining technical and problem-solving skills within game development.

Professional Experience

Jun 2023 - Aug 2025 Software Developer | Zeus Learning

Mumbai, India

- Built and integrated React-based educational games, extending functionality and improving user engagement.
- Enhanced backend systems using .NET and SQL, improving scalability and stability of core game services.
- Implemented WCAG accessibility and data protection (GPC) standards, reinforcing inclusivity and reliability.
- Applied Agile workflows (JIRA, MS Teams, QA cycles) to deliver iterative, high-quality releases aligned with production goals.

Mar 2023 - Apr 2023 Web Developer Intern | Dot Syndicate

Mumbai, India

- Developed interactive client portals and Firebase-integrated web tools, honing full-stack skills applicable to live-service game systems.
- Assisted in requirement discussions and feature documentation, learning structured production practices.

Jun 2022 - Sept 2022 Game Developer Intern | IDZ Digital Private Limited

Mumbai, India

- Designed and developed multiple Unity C# mini-games for an educational parent game, focusing on gameplay mechanics and interactive learning systems.
- Collaborated with designers, artists, and animators to prototype and iterate on gameplay features.
- Ensured optimized performance and smooth gameplay across devices.
- Gained practical experience with version control, feature iteration, and cross-disciplinary teamwork, which are core principles of Unreal.

Education

2025 - 2026 Kingston University — MSc Game Development (Programming)

Modules: 3D Games Programming, Connected Games Development, Digital Studio Practise, Machine Learning and Deep Learning

2019 - 2023 Rizvi College of Engineering — B.Eng Computer Science

Modules: Data Structures and Algorithm, Database Management System, AI and Machine Learning, Blockchain, Cyber Security, Social Media Analytics

Courses & Certifications

Introduction to Game Development — Michigan State University (Coursera)

Used Unity to create 3D games across multiple platforms, learning the fundamentals of game mechanics, player control, and iteration.

Game Design and Development — Michigan State University (Coursera)

Designed and developed a 2D space shooter game using Unity, applying core gameplay design principles and C# scripting.

AI-900: Microsoft Azure AI Fundamentals — Microsoft

Gained foundational understanding of AI and ML concepts, useful for procedural systems and adaptive game behavior.

Professional Skills

- Problem Solving
- Team Collaboration
- Rapid Prototyping
- Adaptability
- Critical Thinking
- Version Control
- Agile Workflow
- Continuous Learning

Technical Skills

Languages: C++, C#, Python, JavaScript

Engines: Unreal Engine, Unity

Tools: Blueprint, Git, JIRA, Redmine, MS Teams

Frameworks: .NET, React, Angular

Concepts: Gameplay Systems, Real-Time Rendering, Game Logic, Object-Oriented Design

Interests

Gameplay Engineering | Gaming | Music
